Technical data

Basis	SMX Hybrid Polymer
Consistency	Stable paste
Curing system	Moisture curing
Skin formation* (20°C / 65% R.H.)	Ca. 10 min
Curing speed * (20°C / 65% R.H.)	2 mm/24h → 3 mm/24h
Hardness	38 ± 5 Shore A
Density	1,04 g/ml
Elastic recovery (ISO 7389)	> 75 %
Maximum allowed distortion	± 20 %
Max. tension (DIN 53504)	2,40 N/mm ²
Elasticity modulus 100% (DIN 53504)	0,80 N/mm ²
Elongation at break (DIN 53504)	300 %
Temperature resistance	-40 °C → 90 °C
Application temperature	5 °C → 35 °C

(*) these values may vary depending on environmental factors such as temperature, moisture, and type of substrates.

Product description

Pool Fix is a high quality, crystal clear, neutral, elastic, 1-component adhesive based on SMX-Polymer.

Properties

- Excellent adhesion on nearly all surfaces, even if slightly moist.
- crystal clear formulation
- Impervious to mould, contains ZnP (biocide with fungicidal action)
- Good extrudability even at low temperatures
- Free of isocyanates, solvents, halogens and acids
- Permanently elastic after curing
- Can be painted with all water based paints and many other systems (to be tested)

Applications

- Repairing of mosaic en tiles.
- Repairing of damage in eg. concrete stairs.
- Easy bonding and sealing of swimming pool components (Skimmer, spot, valves, drain,...)
- Temporary repair of small leakages
- Repairing and reinforcing of damaged surfaces in metal and polyester.

- **WARNING:** Only for temporary repairs, not for permanent repairs, pressurized lines or structural applications.

Packaging

Colour: light blue transparent, transparent when applied

Packaging: 290 ml cartridge

Shelf life

12 months in unopened packaging in a cool and dry storage place at temperatures between +5°C and +25°C.

Chemical resistance

Good resistance to (salt)water, aliphatic solvents, hydrocarbons, ketones, esters, alcohols, diluted mineral acids and alkalis.

Remark: This technical data sheet replaces all previous versions. The directives contained in this documentation are the result of our experiments and of our experience and have been submitted in good faith. Because of the diversity of the materials and substrates and the great number of possible applications which are out of our control, we cannot accept any responsibility for the results obtained. Since the design, the quality of the substrate and processing conditions are beyond our control, no liability under this publication is accepted. In every case it is recommended to carry out preliminary experiments. Soudal reserves the right to modify products without prior notice.

Pool Fix

Page 2 from 3

Substrates

Substrates: all usual building substrates, glass, treated wood, PVC, plastics, metals, stone, concrete, ... Not suitable for PE, PP, PTFE and bitumen

Nature: clean, free of dust and grease.

Surface preparation: Porous surfaces in water loaded applications should be primed with Primer 150. All smooth surfaces can be treated with Soudal Surface Activator.

NOTICE: bonding plastics like PMMA (e.g. Plexi® glass), polycarbonate (e.g. Makrolon® or Lexan®) in stress loaded applications can give rise to stress cracking and crazing in these substrates. The use of Pool Fix is not recommended in these applications.

Joint dimensions

Min. width for bonding: 2 mm

Max. width for bonding: 10 mm

Application method

Application method: With manual- or pneumatic caulking gun.

Cleaning: With Fix ALL Cleaner immediately after use. Cured Pool Fix can only be removed mechanically.

Finishing: With a soapy solution or Soudal Finishing Solution before skinning.

Repair: With the same material

Health- and Safety Recommendations

Take the usual labour hygiene into account. Consult label for more information.

Remarks

- Not suitable for bonding aquariums.
- Do not use in applications where continuous water immersion is possible.
- Pool Fix is paintable with waterbased paints, however due to the large number of paints and varnishes available we strongly suggest a compatibility test before application.
- Pool Fix can be applied to a wide variety of substrates. Due to the fact that specific substrates such as plastics, like polycarbonate, etc, may differ from manufacturer to manufacturer, we recommend preliminary compatibility test.
- Pool Fix is not suitable for expansion joints.
- Pool Fix can not be used as a glazing sealant.
- Pool Fix cannot be used on natural stone. Because the adhesion surface will discolour under influence of the sealant (looks wet) and because this is visible through the crystal clear sealant it seems like staining has occurred.
- Pool Fix has a good UV resistance but can discolour under extreme conditions or after very long UV exposure.
- A total absence of UV can cause a color change of the sealant.
- Discoloration due to chemicals, high temperatures, UV-radiation may occur. A change in color does not affect the technical properties of the product.

Environmental clauses*Lead regulation:*

Pool Fix conforms to the requirements of LEED. Low –Emitting Materials: Adhesives and Sealants. SCAQMD rule 1168. Complies with USGBC LEED® 2009 Credit 4.1: Low-Emitting Materials – Adhesives & Sealants concerning the VOC-content.
